DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 22, 28, 29, and 36 – 39, drawn to a (self assembly) process for preparing luminescent organic / inorganic nanocomposite thin films, classified in class 427, subclass 372.2.
- II. Claims 23 – 27 and 30 – 35, drawn to a luminescent ordered nanocomposite structure / HLED device, classified in class 428, subclass 690.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made, respectively. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, such as a CVD or vacuum evaporation / sublimation process in which appropriate organic compounds (e.g., containing electron transport, hole transport, or emissive functional groups) and silica precursors are co-deposited so as to be chemically bound and form a luminescent nanocomposite.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and

recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement, to be complete, must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143). Please note that, although the preambles of Claims 25 – 27 indicate that the aforementioned claims depend from Claim 19 (which is a process claim), the claims are drawn to a “luminescent ordered nanocomposite structure” and therefore have been grouped in Group II (i.e., with the product claims).
